studies	\$1	00.04	· · · · · · · · · · · · · · · · · · ·
Diffusion topsor MPL + histopathology of brain		Q2.Other	University of Pittsburgh
microstructure + fiber pathways	\$24	Q2.Other	University of Pittsburgh
Genetics of autistic disorder	\$916	Q2.2	University of California, San Diego
Sleep in children with autism	\$1,335	Q2.Other	Vanderbilt University
Evaluation and treatment of copper/zinc imbalance in children with autism	\$1,622	Q2.2	Penn State Milton S. Hershey Medical Center
Neural mechanisms of attentional networks in autism	\$2,282	Q2.5	Mount Sinai School of Medicine
Optimization of methods for production of both ICSI- and SCNT derived baboon	\$2,284	Q2.Other	Southwest Foundation for Biomedical Research
Structural brain differences between autistic and typically-developing siblings	\$2,802	Q2.Other	Stanford University
Functional neuroimaging of children with autism - 05	\$3,853	Q2.Other	Carnegie Mellon University
Family characterization network - 2	\$5,353	Q2.5	Boston University School of Medicine
Brain glutamate concentrations in autistic adolescents by MRS	\$9,703	Q2.Other	Mount Sinai School of Medicine
Urinary assay for HPL	\$11,048	Q2.Other	Autism House
Presence of clostridia in children with and without ASD	\$12,054	Q2.Other	Center for Autism and Related Disorders
Tibial bone lead levels	\$12,500	Q2.Other	Autism Associates of New York
A model-based investigation of face processing in autism	\$18,550	Q2.Other	Georgetown University
Description and assessment of sensory abnormalities in ASD	\$18,968	Q2.Other	Center for Autism and Related Disorders
Neurobiology of spatial reversal learning	\$20,651	Q2.Other	University of Delaware
Functional MRI of attention regulation in people with and without autism	\$22,831	Q2.5	Georgetown University
Brain region specific oxidative stress	\$25,575	Q2.2	Brigham and Women's Hospital
Psychophysiological approaches to the study of autism	\$26,000	Q2.Other	University of Washington
Amygdala structure & biochemistry in adolescents with autism	\$27,276	Q2.Other	University of Wisconsin - Madison
Evaluation of sleep disturbance in children with ASD	\$27,456	Q2.Other	Center for Autism and Related Disorders
Autism: Role of oxytocin	\$27,862	Q2.2	University of Kansas Medical Center
Influence of oxidative stress on transcription and alternative splicing of methionine synthase in autism	\$28,000	Q2.2	Northeastern University
Visual perspective-taking and the acquisition of American Sign Language by deaf children with autism	\$28,000	Q2.5	University of Texas at Austin
Informational and neural bases of empathic accuracy in autism spectrum disorder	\$28,000	Q2.5	Columbia University
Neural basis of socially driven attention in children with autism	\$28,000	Q2.5	University of California, Los Angeles

Project Title	Funding	Strategic Plan Objective	Institution
FMRI evidence of genetic influence on rigidity in ASD	\$28,000	Q2.5	University of Michigan
Linguistic perspective-taking in adults with high- functioning autism: Investigation of the mirror neuron system	\$28,000	Q2.5	Carnegie Mellon University
Caspr2 dysfunction in autism spectrum disorders	\$28,000	Q2.Other	Yale University
Cognitive control and social engagement among younger siblings of children with autism	\$28,000	Q2.Other	University of Miami
Roles of Wnt signaling/scaffolding molecules in autism	\$28,000	Q2.Other	University of California, San Francisco
Neural mechanisms of social cognition and bonding - NIH	\$28,536	Q2.Other	Emory University
Development behavioral & neurophysiological measures for early autism diagnosis	\$28,536	Q2.Other	Emory University
Neural basis of audiovisual integration during language comprehension in autism	\$30,000	Q2.5	University of Rochester
Visuospatial processing in adults and children with autism	\$30,000	Q2.5	Carnegie Mellon University
Molecular basis of autism associated with human adenylosuccinate lyase gene defects	\$30,000	Q2.Other	University of Delaware
Epstein-Barr virus research	\$30,000	Q2.Other	Pediatric Gastrointestinal Association
Neural mechanisms of social cognition and bonding - AS	\$31,500	Q2.Other	Emory University
Understanding perception and action in autism	\$32,000	Q2.5	Kennedy Krieger Institute
Phonological processing in the autism spectrum	\$32,000	Q2.5	Heriot-Watt University
Mimicry and imitation in ASDs	\$32,000	Q2.5	University of Connecticut
L-type Ca2+ channel regulation of dendritic arborization	\$32,845	Q2.Other	Stanford University
Are neuronal defects in the cerebral cortex linked to autism?	\$33,000	Q2.Other	Memorial Sloan-Kettering Cancer Center
Autism: The neural substrates of language in siblings	\$33,151	Q2.Other	Boston University Medical Campus
Neuronal oxidative stress in autism	\$37,500	Q2.2	Case Western Reserve University
Visual system connectivity in a high-risk model of autism	\$41,000	Q2.Other	Boston Children's Hospital
Neural circuit deficits in animal models of Rett syndrome	\$44,000	Q2.Other	Cold Spring Harbor Laboratory
Neural substrate of language and social cognition: Autism and typical development	\$44,846	Q2.5	Massachusetts Institute of Technology
Plasticity in autism spectrum disorders: Magnetic stimulation studies	\$46,826	Q2.Other	Beth Israel Deaconess Medical Center
Emotional mimicry in children with autism	\$47,140	Q2.Other	University of Denver
FMRI studies of cerebellar functioning in autism	\$47,500	Q2.5	University of Illinois at Chicago
Imaging synaptic neurexin-neuroligin complexes by proximity biotinylation: Applications to the molecular pathogenesis of autism	\$47,500	Q2.Other	Massachussetts Institute of Technology

Project Title	Funding	Strategic Plan Objective	Institution
BDNF secretion and neural precursor migration	\$47,500	Q2.Other	Dana-Farber Cancer Institute
Social attention in normal and autistic individuals	\$48,796	Q2.Other	Yale University
Optical analysis of circuit-level sensory processing in the cerebellum	\$49,000	Q2.Other	Princeton University
Maternal inflammation alters fetal brain development via Tumor Necrosis Factor-alpha	\$49,646	Q2.2	Stanford University
Markers of inflammation and oxidative damage	\$50,000	Q2.2	Research Foundation for Mental Hygiene, Inc.
Slick and slack heteromers in neuronal excitability	\$51,278	Q2.Other	Yale University
The neural substrates of repetitive behaviors in autism	\$52,799	Q2.Other	Boston University Medical Campus
Architecture of myelinated axons linking frontal cortical areas	\$54,000	Q2.Other	Boston University
The role of the autism-associated gene Tuberous Sclerosis Complex 2 (TSC2) in presynaptic development	\$55,000	Q2.Other	University of California, San Diego
Deriving neuroprogenitor cells from peripheral blood of individuals with autism	\$60,000	Q2.2	University of Utah
Is autism a mitochondrial disease?	\$60,000	Q2.2	University of California, Davis
Oxidative stress and immune response in autism	\$60,000	Q2.5	New York State Institute for Basic Research in Developmental Disabilities
Cortical mechanisms underlying visual motion processing impairments in autism	\$60,000	Q2.5	Harvard Medical School
The neural correlates of transient and sustained executive control in children with autism spectrum disorder	\$60,000	Q2.5	University of Missouri
Analysis of brain microstructure in autism using novel diffusion MRI approaches	\$60,000	Q2.5	Washington University School of Medicine
Psychophysiological mechanisms of emotion perception	\$60,000	Q2.5	Georgia State University
Communication and prosody in autism: A pilot fMRI study using a sib-pair design	\$60,000	Q2.5	Washington University in St. Louis
Exploring functional brain connectivity for visual cognition in autism spectrum disorder	\$60,000	Q2.5	University of Kentucky
Victimization, pragmatic language, and social and emotional competence in adolescents with ASD	\$60,000	Q2.5	Queen's University
Electrical measures of functional cortical connectivity in autism	\$60,000	Q2.5	University of Washington
Relation of sleep epileptiform discharges to insomnia and daytime behavior	\$60,000	Q2.Other	Vanderbilt University
Pathway-based genetic studies of autism spectrum disorder	\$60,000	Q2.Other	University of Pennsylvania
Attentional abnormalities in autism: An electronphysiological study of the basal forebrain and central nucleus of the amygdala	\$60,000	Q2.Other	University of California, San Diego

Project Title	Funding	Strategic Plan Objective	Institution	
Neuroligins and neurexins as autism candidate genes: Study of their association in synaptic connectivity	\$60,000	Q2.Other	University of California, San Diego	
Mouse genetic model of a dysregulated serotonin transporter variant associated with autism	\$60,000	Q2.Other	Vanderbilt University	
Using genetically modified mice to explore the neuronal network involved in social recognition	\$60,000	Q2.Other	Haifa University	
An adult brain-specific mouse model of neuronal TSC inactivation	\$60,000	Q2.Other	Massachusetts General Hospital	
The genetics of restricted, repetitive behavior: An inbred mouse model	\$60,000	Q2.Other	University of Florida	
Identification and functional characterization of gene variants	\$60,000	Q2.Other	Universita Campus Bio-Medico di Roma	
Identification of UBE3A substrates using proteomic profiling in Drosophila	\$60,000	Q2.Other	University of Tennessee Health Science Center	
A novel cell-based assay for autism research and drug discovery	\$60,000	Q2.Other	University of Arizona	
Past, present and future-oriented thinking about the self in children with ASD	\$61,000	Q2.5	City University, London	
Gamma band dysfunction as a local neuronal connectivity endophenotype in autism	\$61,000	Q2.5	University of Colorado Denver	
Quantifying white matter connectivity in autism	\$61,000	Q2.5	University of Utah	
The effect of interneuron loss on minicolumn structure	\$64,376	Q2.Other	University of Louisville	
Exploring the role of synaptic proteins in mouse models of autism	\$66,228	Q2.Other	The Rockefeller University	
Cognitive neuroscience -3	\$70,933	Q2.Other	Boston Children's Hospital	
Face processing and brain function associated with autistic symptoms in fragile X	\$73,500	Q2.Other	University of Wisconsin - Madison	
Neuroimaging of social perception	\$76,470	Q2.Other	Yale University	
Cortical complexity in children with autism unaffected siblings and controls	\$79,000	Q2.Other	Stanford University	
Cognitive neuroscience - 4	\$80,571	Q2.Other	Massachusetts General Hospital	
Anatomical connectivity in the autistic brain	\$84,666	Q2.Other	New York University School of Medicine	
Core B: Outreach and translation	\$85,017	Q2.Other	University of California, Davis	
Coherence and temporal dynamics in auditory cortex of children with autism	\$87,875	Q2.Other	Massachusetts General Hospital	
Investigation of cortical folding complexity in children with autism, their autism-discordant siblings, and controls	\$100,000	Q2.5	Stanford University	
Animal models of autism: Pathogenesis and treatment	\$100,000	Q2.Other	University of Texas Southwestern Medical Center	

Project Title	Funding	Strategic Plan Objective	Institution	
Disturbances of affective contact: Development of brain mechanisms for emotion	\$104,906	Q2.Other	University of Pittsburgh	
Impact of innate immunity on regressive autism	\$110,000	Q2.2	University of Medicine & Dentistry of New Jersey	
Social behavior deficits in autism: Role of amygdala	\$110,000	Q2.Other	State University of New York Upstate Medical Center	
Vulnerability phenotypes and susceptibility to environmental toxicants: From organism to mechanism	\$110,000	Q2.Other	University of Rochester	
Cognitive neuroscience - 2	\$111,690	Q2.Other	Boston University School of Medicine	
Regulation of inflammatory TH17 cells in ASD	\$112,500	Q2.2	New York University School of Medicine	
ingrailed and the control of synaptic circuitry in Prosophila	\$112,500	Q2.Other	University of Puerto Rico Medical Sciences	
tiology of sleep disorders in ASD: Role of inflammatory ytokines	\$112,500	Q2.Other	University of Maryland, Baltimore	
nvestigation of the link between early brain enlargement and abnormal functional connectivity in autism spectrum isorders	\$120,000	Q2.5	University of Washington	
leurocognitive basis of language processing in autism	\$129,756	Q2.Other	Duquesne University	
leg investigation of the neural substrates underlying isual perception in autism	\$130,000	Q2.5	Massachussetts General Hospital	
Maternal infection and autism: Impact of placental sufficiency and maternal inflammatory responses on etal brain development	\$130,000	Q2.Other	Stanford University	
functional neuroimaging of children with autism - 06	\$136,446	Q2.Other	Carnegie Mellon University	
roject 2: Immunological susceptibility of autism	\$136,641	Q2.2	University of California, Davis	
Consequences of maternal antigen exposure on ffspring immunity: An animal model of vertical tolerance	\$137,000	Q2.Other	The Fox Chase Cancer Center	
Dendritic organization within the cerebral cortex in autism	\$140,000	Q2.5	The Open University	
ognitive neuroscience - 1	\$142,158	Q2.Other	Massachusetts Institute of Technology	
ognitive control in autism	\$144,251	Q2.Other	University of California, Davis	
lultisensory processing in autism	\$145,000	Q2.5	University of North Carolina at Chapel Hill	
ongitudinal neurogenetics of atypical social brain evelopment in autism	\$146,082	Q2.5	Yale University	
ex differences in early brain development; Brain evelopment in Turner Syndrome	\$147,884	Q2.Other	University of North Carolina at Chapel Hill	
he role of the amygdala in autism	\$149,268	Q2.Other	University of California, Davis	
Stereological analyses of neuron numbers in frontal ortex from age 3 years to adulthood in autism	\$150,000	Q2.5	University of California, San Diego	
IRI study of brain development in school age children vith autism	\$150,000	Q2.5	University of North Carolina at Chapel Hill	

Project Title	Funding	Strategic Plan Objective	Institution	
Neural correlates of serotonin transporter gene polymorphisms and social impairment in ASD	\$150,000	Q2.5	University of Michigan	
Neural correlates of social exchange and valuation in autism	\$150,000	Q2.5	Baylor College of Medicine	
Novel approaches for investigating the neurology of autism: Detailed morphometric analysis and correlation with motor impairment	\$150,000	Q2.5	Kennedy Krieger Institute	
Behavioral and functional neuroimaging investigations of visual perception and cognition in autistics	\$150,000	Q2.5	Université de Montréal	
A combined fMRI-TMS study on the role of the mirror neuron system in social cognition: Moving beyond correlational evidence	\$150,000	Q2.Other	University of California, Los Angeles	
Analysis of cortical circuits related to ASD gene candidates	\$150,000	Q2.Other	Cold Spring Harbor Laboratory	
The effects of Npas4 and Sema4d on inhibitory synapse formation	\$150,000	Q2.Other	Boston Children's Hospital	
Developmental versus acute mechanisms mediating altered excitatory synaptic function in the fragile X syndrome mouse model	\$150,000	Q2.Other	University of Texas Southwestern Medical Center	
Neuropharmacology of motivation and reinforcement in mouse models of autistic spectrum disorders	\$150,000	Q2.Other	University of North Carolina School of Medicine	
NrCAM, a candidate susceptibility gene for visual processing deficits in autism	\$150,000	Q2.Other	University of North Carolina at Chapel Hill	
Immune molecules and cortical synaptogenesis: Possible implications for the pathogenesis of autism	\$150,000	Q2.Other	University of California, Davis	
Modeling and pharmacologic treatment of autism spectrum disorders in Drosophila	\$150,000	Q2.Other	Albert Einstein College of Medicine of Yeshiva University	
Role of Pam in synaptic morphology and function	\$150,000	Q2.Other	Massachusetts General Hospital	
Role of neuroligin in synapse stability	\$150,000	Q2.Other	Oklahoma Medical Research Foundation	
The intersection of autism and ADHD	\$152,423	Q2.Other	Washington University in St. Louis	
Neural substrates of gaze and face processing in autism	\$152,671	Q2.Other	Boston University Medical Campus	
Newborn screening for fragile X	\$152,847	Q2.Other	University of Washington	
Genetics and physiology of social anxiety in fragile X	\$157,300	Q2.Other	University of California, Davis	
Biomedical informatics research network: National Database for Autism Research	\$160,000	Q2.Other	University of California, San Diego	
GABRBeta3 expression variation and the autism spectrum	\$162,073	Q2.Other	Children's Memorial Hospital, Chicago	
Multimodal brain imaging in autism spectrum disorders	\$162,151	Q2.Other	University of Washington	
Collaborative neuropathology workgroup: A comprehensive multilevel analysis of frontal lobe microstructure in autism	\$166,000	Q2.5	University of California, San Diego	

Project Title	Funding	Strategic Plan Objective	Institution
Magnetic source imaging and sensory behavioral characterization in autism	\$166,302	Q2.Other	University of California, San Francisco
Psychosis and autoimmune diseases in Denmark	\$184,218	Q2.2	Johns Hopkins University
MRI measures of neural connectivity in Asperger's disorder	\$186,327	Q2.Other	University of Michigan
Fraternal birth order effects on behavior	\$205,200	Q2.2	Michigan State University
Memory for visual material	\$208,829	Q2.Other	University of Washington
Assessing information processing and capacity for understanding language in non-verbal children with autism	\$220,000	Q2.5	Rutgers University; City University of New York
Anterior cingulate and fronto-insular related brain networks in autism	\$222,060	Q2.Other	Mount Sinai School of Medicine
Imaging the autistic brain before it knows it has autism	\$222,866	Q2.Other	University of California, San Diego
The mirror neuron system in the monkey and its role in action understanding	\$222,870	Q2.Other	Massachusetts General Hospital
Neurobiology of affective prosody perception in autism	\$228,000	Q2.Other	Washington University in St. Louis
Gaba(A) receptor modulation via the beta subunit	\$228,787	Q2.Other	Emory University
Restricted and repetitive behaviors in young children with autism	\$233,365	Q2.5	Duke University
Studying the biology and behavior of autism at 1-year: The well-baby check-up appointment	\$237,015	Q2.Other	University of California, San Diego
Neural mechanisms for social cognition in ASD	\$238,040	Q2.5	Massachusetts Institute of Technology
Autism spectrum disorder and the visual analysis of human motion	\$250,000	Q2.5	Rutgers, The State University of New Jersey
Brain circuitry in simplex autism	\$250,000	Q2.Other	Washington University in St. Louis
Cerebellar anatomic and functional connectivity in autism spectrum disorders	\$254,625	Q2.Other	University of Texas at Austin
Mouse models of the neuropathology of Tuberous Sclerosis Complex	\$258,136	Q2.Other	University of Texas Health Science Center at Houston
Chromatin alterations in Rett syndrome	\$271,798	Q2.Other	University of Massachusetts Medical School
Statistics and research design core	\$278,814	Q2.Other	Yale University
Chemosensory processing in chemical communication	\$280,890	Q2.Other	Florida State University
GABAergic dysfunction in autism	\$294,333	Q2.Other	University of Minnesota
Development of brain connectivity in autism	\$300,000	Q2.5	New York School of Medicine
Functional neuroanatomy of developmental changes in face processing	\$302,360	Q2.Other	University of Kentucky
The fusiform and amygalda in the pathobiology of autism	\$312,347	Q2.Other	Children's Hospital of Philadelphia
Maternal responsivity and the development of children with FXS	\$314,520	Q2.Other	University of North Carolina at Chapel Hill

Project Title	Funding	Strategic Plan Objective	Institution	
Testing neurological models of autism	\$315,526	Q2.Other	California Institute of Technology	
Mirror neuron and reward circuitry in autism	\$315,592	Q2.Other	University of California, Los Angeles	
Social and affective components of communication	\$316,589	Q2.Other	Salk Institute For Biological Studies	
The imaging core	\$318,616	Q2.Other	University of California, Los Angeles	
Training in pediatric neurology	\$324,270	Q2.Other	Yeshiva University	
The neural basis of social cognition	\$325,412	Q2.Other	West Virginia University	
Genetics of language & social communication: Connecting genes to brain & cognition	\$326,310	Q2.Other	University of California, Los Angeles	
Serotonin, corpus callosum, and autism	\$327,250	Q2.Other	University of Mississippi Medical Center	
Motor skill learning in autism	\$327,316	Q2.Other	Kennedy Krieger Institute	
Development of neural pathways in infants at risk for autism spectrum disorders	\$328,313	Q2.Other	University of California, San Diego	
Multisensory integration of faces and voices in the primate temporal lobe	\$336,490	Q2.Other	Princeton University	
Neuroimaging studies of connectivity in ASD - 004	\$354,401	Q2.Other	Yale University	
Cognitive affective and neurochemical processes underlying is in autism	\$377,097	Q2.Other	University of Illinois at Chicago	
Neurobiological correlates of language dysfunction in autism spectrum disorders	\$405,921	Q2.Other	Alexian Brothers Medical Center	
Towards an endophenotype for amygdala dysfunction	\$414,395	Q2.Other	California Institute of Technology	
Development of multisensory cortex: Role of experience	\$419,437	Q2.Other	Vanderbilt University	
Family characterization network - 1	\$463,694	Q2.5	Massachusetts General Hospital	
Impacts of parenting adolescents & adults with autism	\$480,757	Q2.5	University of Wisconsin - Madison	
Systems connectivity + brain activation: Imaging studies of language + perception	\$487,050	Q2.Other	University of Pittsburgh	
Atypical late neurodevelopment in autism: A longitudinal MRI and DTI study	\$507,505	Q2.Other	University of Utah	
Neuroimmunologic investigations of autism spectrum disorders (ASD)	\$512,425	Q2.2	National Institutes of Health	
The development of face processing	\$516,410	Q2.Other	Boston Children's Hospital	
Structural and chemical brain imaging of autism	\$521,038	Q2.Other	University of Washington	
FMRI studies of neural dysfunction in autistic toddlers	\$604,727	Q2.Other	University of California, San Diego	
A longitudinal MRI study of infants at risk for autism- Supplemental	\$622,534	Q2.5	University of North Carolina at Chapel Hill	
Multimodal neuroimaging of white matter in autism	\$698,987	Q2.Other	Massachusetts General Hospital	
Autism Treatment Program (ATP)	\$700,000	Q2.6	Autism Speaks	
Primate models of autism	\$727,322	Q2.2	University of California, Davis	

Project Title	Funding	Strategic Plan Objective	Institution
Studies of central nervous system functional anatomy	\$1,048,141	Q2.2	National Institutes of Health
A longitudinal MRI study of infants at risk for autism	\$2,726,522	Q2.5	University of North Carolina at Chapel Hill
Functional MRI method development	\$3,074,547	Q2.Other	National Institutes of Health
Cell repository	\$4,318,579	Q2.1	Rutgers, The State University of New Jersey
